

CONTROL of PARTICLE SIZE

Silver nano-sized particles

Feature

Ag nano particles synthesized by chemical reduction

Powders: 100, 200, 500 nm

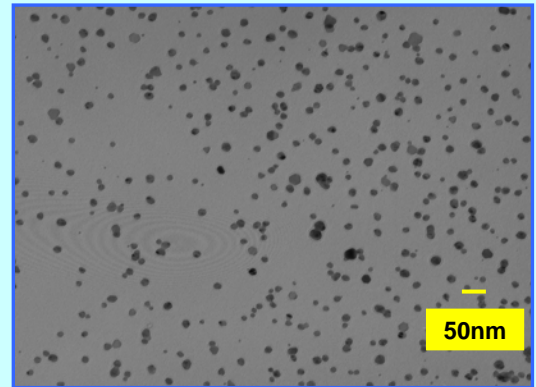

Particle size 200 nm

Application

Wiring, Filler

Aqueous Dispersion: 10~100 nm

Particle size 20 nm

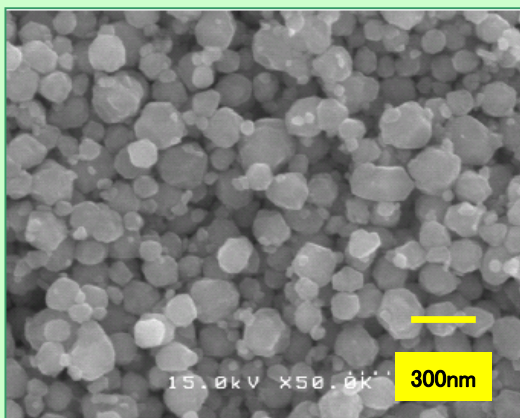

Application

Antimicrobial, Photonics

HOT release Cu nano-sized particles

Feature

Cu nano particles synthesized by chemical reduction with less environmental impact and no contamination of alkaline metals

Application

Wiring: Conductive paste, Screen inks and IJ inks
